

How to connect to KTK Wi-Fi

Connecting from university workplaces, all KTK systems are connected via single sign-on (SSO - Single Sign-on), i.e. **the user does not need to enter additional login data.**

Connecting from personal devices, you must specify the domain (**ad\ or @ktk.lt**) and **the login name in the format of 5 letters of the last name and 3 of the first name** (if the system did not specify otherwise by adding the number 1, etc.), which was sent to you by e-mail and is used to connect to KTK work computers:

- **ad\ surnanam** – domain (ad), backslash (\), Your login (format 5 letters) (e.g., surna) (e.g., nam);
- **surnanam@ktk.lt** (pavarvar@ktk.lt) – Your login (format 5 letters) (e.g., surna) (e.g., nam) and domain (@ktk.lt);
- **password** (slaptažodis) – Your own password.

To connect to the wireless connection **choose KTK WIFI**. Advanced options **for connecting mobile devices**:

- EAP way (būdas) 2: PEAP
- Identification Phrase: MSCHAPV2
- CA certificate: Deny (Nepatvirtinti)
